

IHS Duoseal PET

Induction Heat Seal Duoseal PET

The IHS Duoseal PET offers tamper-evidence and protection (steady and permanent protection against leakage or evaporation) of the filling good. The sealing layer which might come in contact with the filling content is harmless to health.

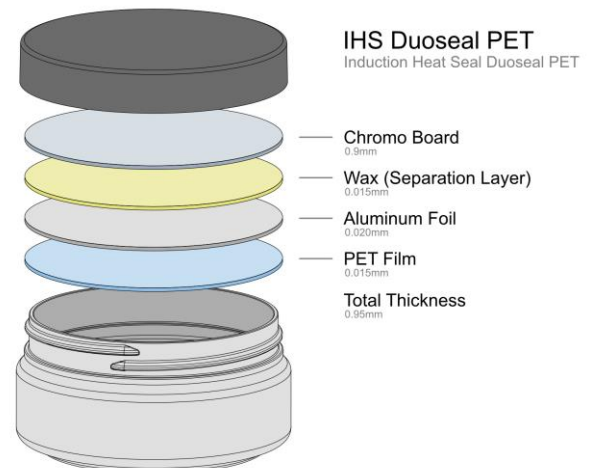

The binding of the carton to the membrane (multilayer film) is done by wax dots. This liner is called "two-piece" because, as the name implies, it consists of two parts: the carton and the film. This material is available for both induction heat sealing and adhesives, for different types of bottles.

Features

- ✓ Safety & tamper evidence
- ✓ Leak prevention and mechanical pressure
- ✓ Product freshness and extension of shelf life
- ✓ Short lead-times
- ✓ Through weld
- ✓ Sealed regardless there are substances on the jar neck
- ✓ Available with micro-perforation

The seal is suitable for

- ✓ motor oil / lube oil
- ✓ agrochemical industry
- ✓ Wet food
- ✓ Dry food
- ✓ Powder food
- ✓ Nutrition and supplements
- ✓ Spices
- ✓ Cosmetics
- ✓ High and low temperatures

Specifications

Product type:	IHS Duoseal ALU30PET15
Foam thickness:	0,09 – 1,00 mm
Packaging Type:	PET / PE
Performance Characteristic:	Welded (residue on jar neck)
Composition Type:	Two pieces
